ABOUT ME

Computer Engineering student pursuing offensive security and penetration testing. Practical lab work includes web application testing with Burp Suite and Linux systems. Seeking a cybersecurity internship or junior role to continue developing hands-on skills.

EDUCATION & TRAINING

Azerbaijan State Oil and Industry University
BSc in Computer Engineering | 2024–present

MilliSec — Red Team / Penetration Testing Course
May 2026–present · Web application security, server pentesting, Linux privilege escalation

SECURITY PROJECT

CampusSecure — Web Application Security Lab
github.com/HesenagaBayramov/CampusSecure

- Set up a controlled Python, Flask, and SQLite student portal for security testing.
- Used Burp Suite Proxy and Repeater to test IDOR/BOLA, BFLA, and protected role updates in vulnerable and secure modes in a Kali Linux–Ubuntu Server lab.

TECHNICAL SKILLS

Security testing

- Web application testing: IDOR/BOLA, BFLA, protected role updates
- Server pentesting labs; Linux privilege escalation

Tools & systems

- Burp Suite (Proxy, Repeater); Kali Linux; Ubuntu Server
- Networking; Docker; Git; VS Code

Development

- Python; Flask; SQLite; HTML; CSS; JavaScript
- C/C++; Java

LANGUAGES

Azerbaijani — Native · English — Intermediate (B1) · Russian — Beginner (A1–A2)
